TITLE: Database and Application Administrator

SUMMARY:

The Database and Application Administrator will work collaboratively with the Vice President of Information Technology and other members of the Pentucket Technology Group to manage the bank’s business application portfolio and related database architecture, deploy and maintain custom reporting services, provide escalated Help Desk support to end-users, respond to incident and service request tickets, and assist with work station configuration management and deployment. The Database and Application Administrator will also help ensure proper safeguards for the physical security and the data integrity of the bank’s computer systems, and assist in various projects as assigned.

DUTIES AND RESPONSIBILITIES:

Include the following, other duties may be assigned.

- This role shall plan, develop, implement, and administer information systems and applications for the acquisition, storage, retrieval, transfer, and processing of data.
- Administer, configure and support mission critical bank applications.
- Configure and maintain end-user access to assigned applications.
- Install, maintain, monitor, optimize, backup, and recover database management systems and associated applications.
- Serve as a subject matter expert for our data driven applications and drive training, deployment, and adoption of key enterprise solutions in the Bank.
- Provide peer training on assigned applications as needed.
- Develop and implement data mining and data warehousing.
- Build custom, high quality analytical data sets and reports utilizing Bank data sources.
- Serves as the primary or secondary (backup) administrator of assigned applications.
- Provide escalation support for help desk operations.
- Analyze and recommend data requirements and designing, developing, installing, and implementing data driven applications.
- Partner on data focused initiatives that support the bank’s operations and strategic initiatives.
- Ensure adherence to information security/cybersecurity policies, principles, practices and standards in the delivery of data management services.
- Create and maintain documentation for assigned applications.
- Participate in business continuity and disaster recovery testing.
- Research, evaluate and recommend new database and software technologies and architectures and justify recommendations to support purchasing efforts.
- Represent the Bank through participation in various community and industry related activities, and actively promote the Bank wherever and whenever possible.
• Establish a working knowledge of Pentucket Bank’s Infrastructure (e.g., VxRails, vSphere, vCenter, networking) at all locations.
• Ensure the Pentucket Technology Group is efficiently and effectively providing value to Pentucket Bank and its Customers

SUPERVISORY RESPONSIBILITIES: This position has no supervisory responsibility, but will mentor and guide other members of the team.

EDUCATION and/or EXPERIENCE:

• BA/BS degree in technical field
• 7+ years of relevant work experience
• Minimum of 5 years’ experience with Microsoft Windows operating systems
• Minimum of 3 years’ experience with database and networking technologies
• Technical certifications a plus (AWS, PMP, etc.)

TECHNICAL SKILLS, TRAINING or CERTIFICATIONS:

• Highly proficient in SQL and SQLServer database administration
• Knowledge of database platforms and performance optimization techniques.
• Experience with platforms like AWS/Azure, Tableau, Power BI, SharePoint, and Office365.
• Working knowledge of general client-server, web, and cloud-based application architectures.
• Problem solving and critical thinking skills with exceptional attention to detail.
• Effective written and oral communication, documentation, presentation, and customer service skills
• Project management skills with the ability to coordinate multiple concurrent projects
• Ability to work effectively across functions, disciplines, and levels.
• Expertise with current Windows server and workstation operating systems
• Expertise with Microsoft Active Directory and Group Policy
• Experience with Microsoft Office and Exchange
• Ability to independently support users at multiple branch locations
• Knowledge of banking applications and core processes a plus
• Bi-lingual a plus

PHYSICAL DEMANDS:

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.
While performing the duties of this job, the employee is regularly required to stand; use hands to finger, handle, or feel objects, tools, or controls; reach with hands and arms; and talk or hear. The employee frequently is required to walk and stand. The employee is occasionally required to stoop, kneel, crouch, or crawl. The employee must occasionally lift and/or move up to 50 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception, and the ability to adjust focus.

**WORK ENVIRONMENT:**

The work environment characteristics described here are representative of those an employee encounters while performing the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

The work environment includes several different areas including general office areas, computer rooms, basements, ceiling and possibly construction sites. In the computer rooms, the noise levels are moderate to high and temperatures may be extreme (hot & cold).

**PENTUCKET BANK’S JOB DESCRIPTION ACKNOWLEDGEMENT FORM**

I acknowledge that I have received a written copy of the job description for Database and Application Administrator, as set forth by Pentucket Bank. I understand the essential duties, responsibilities and standards that are required of me in this position.
